Dear Ms. Labanowski:

We were recently made aware of a design review agenda item on the June 25, 2019 agenda for the Winchester Town Advisory Board meeting for DR-19-0429-COUNTY OF CLARK (LV CONV AUTH), regarding the tunneling project to facilitate an underground people mover on the Las Vegas Convention & Visitors Authority (LVCVA) campus.

As you know, the Las Vegas Monorail Company holds a franchise with Clark County to operate the Las Vegas Monorail system and has easement rights for the monorail improvements located on the LVCVA property. While we only have the available materials submitted as part of the agenda item, the proposed underground people mover system intersects our existing system route, and it appears the presented tunnel alignment interferes with our existing columns for the Las Vegas Monorail system and creates significant concern regarding both vertical and lateral loads. We respectfully request time to discuss the details of your project with us to understand the potential impacts and conflicts and make recommendations to eliminate those concerns through further investigation or modification of the application if needed.

I appreciate your immediate attention to this matter and the opportunity to resolve any potential conflicts with our existing system. Please feel free to contact me at (702) 699-8210 with additional questions and to coordinate a meeting time with our project team.

Sincerely,

A handwritten signature in black ink, appearing to read 'C. L. Myles'.
